MAR Core Team Members

Academy Solutions Group provides cutting edge technical solutions including IV&V experience in developing test plans and conducting test and evaluation activities on classified systems. Academy brings classified system level experience and a core of cleared personnel to the team.

Convergent delivers a full range of software engineering services and program support services. They have experience in IT assessments including process and procedure audits and have demonstrated experience in comprehensive IV&V services across all project phases.

As one of the top Cisco Gold Partners in America and their strong partnerships with other industry leaders like VMware and EMC, Force 3 brings industry recognized capabilities in providing implementation and IV&V services for unified communications, security and mobility, virtualization, and network deployments.

Prometheus has strong expertise in Enterprise Architecture, information security, systems engineering, risk management forensics, and capital planning. They approach IV&V, security, and auditing as a full-life cycle process by taking an unbiased role in review and validation of organizational-level requirements against Federal Enterprise Architecture and agency Capital Planning initiatives.
